

Steam Terminal® Modulo

MODULAR STEAM HEAT TRANSFER COMPACT STATIONS

Our ready-to-install, fully piped, wired and tested steam/water compact stations, designed on the basis of our modular heat exchangers, guarantee optimum control quality, a high energy transfer rate and a long service life. The Modulo heat exchangers, baelz 147 and baelz 150, each consist of only one material - copper or stainless steel - and can therefore be completely and easily recycled and replaced.

ADVANTAGES AT A GLANCE

- Fully automatic heat transfer station.
- Exchangeable standard modules for economical installation and running.
- Improved safety in the heat supply.
- Entirely recyclable.
- Fully pre-assembled as a steam terminal, hot water terminal or thermal oil terminal.
- Can be transported with a pallet truck. No packaging required for storage and transport.

Steam Terminal® Modulo with reserve connection for another baelz 147 heat exchanger
